Office Action Summary

Art Unit: 2839

Restriction to one of the following inventions is required under 35 USC 121.

- I. Claims 1-14 drawn to an electrical terminal, class 439.
- II. Claims 15-20 drawn to a method of connecting conductive elements of a battery, class 29.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the electrical terminal could be used to connect conductors of a general type apart from any "grid of a battery unit".

Because these inventions are distinct for reasons given above and have acquired a separate status in the art restriction for examination is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to N. Abrams at telephone number 308-1729.
